

Please arrive ____ minutes prior to appointment for registration.

Test Duration: 60 minutes per study

The below listed studies require prep that must be followed for testing to be performed. Failure to follow prep could result in your procedure having to be rescheduled.

- **Aorta Ultrasound/AAA screening:** non-invasive imaging test that uses sound waves to visualize the abdominal aorta, the largest blood vessel in the abdomen. It's primarily used to screen for and diagnose abdominal aortic aneurysms (AAAs), which are bulges in the aorta.
- **Renal Artery Ultrasound:** non-invasive imaging test using sound waves and Doppler technology to evaluate blood flow and detect blockages (stenosis), clots, or narrowing in the arteries supplying the kidneys. It is primarily used to diagnose the cause of high blood pressure.
- **Nothing by mouth 6 hours prior to exam. You may take your medications with small sips of water.**
- **Please take over the counter Gas-X the night before and morning of the exam.**

The below listed studies **DO NOT** require any prep unless you are also having a Stress Test (ETT, Stress Echo, Nuclear Stress or Cardiac PET) on the same day:

- **Echocardiogram (ECHO):** non-invasive test that uses ultrasound waves to create images of the heart. It allows doctors to assess the heart's structure, function, and blood flow, helping to diagnose various heart conditions.
An IV may be required for use of an imaging enhancement agent.
- **Carotid Ultrasound:** non-invasive imaging test that uses sound waves to visualize the carotid arteries in the neck, assessing blood flow and identifying potential blockages or abnormalities. It helps in detecting carotid artery disease, which can increase the risk of stroke.
- **Upper or Lower Extremity Venous Ultrasound:** non-invasive imaging test that uses sound waves to visualize the veins in the arms and legs to detect blood clots (deep vein thrombosis or DVT) and assess for venous insufficiency.
- **Upper or Lower Extremity Arterial Ultrasound:** non-invasive imaging test that uses sound waves to visualize the arteries in the arms and legs to help identify blockages, narrowing, or aneurysms.
- **ABI:** non-invasive diagnostic test that compares blood pressure in the ankle to blood pressure in the arm to check for Peripheral Artery Disease (PAD).

See reverse for location offerings.

Please Note: Not all studies types performed at every location, please double check with scheduling to verify.

LOCATIONS

**NORTHSIDE
HOSPITAL**

HEART INSTITUTE

NORTHSIDE HOSPITAL CARDIOVASCULAR CARE (NHCC) - 404-845-8200

980 Johnson Ferry Rd. NE
Suite 520
Atlanta, GA 30342

NORTHSIDE HEART (NH) - 404-845-8200

Northside Heart - Atlanta

5670 Peachtree Dunwoody Rd.
Suite 880
Atlanta, GA 30342

Northside Heart -

Alpharetta
3400 Old Milton Pkwy.
Building C, Suite 360
Alpharetta, GA 30005

Northside Heart - Canton

460 Northside Cherokee Blvd.
Suite 150
Canton, GA 30115

Northside Heart -Roswell

1285 Upper Hembree Rd.
Roswell, GA 30076

Northside Heart - Towne Lake

900 Towne Lake Pkwy.
Suite 400
Woodstock, GA 30189

NORTHSIDE CARDIOVASCULAR (NCV) - 404-845-8200

NCV - Barfield

6135 Barfield Rd.
Suite 100
Sandy Springs, GA 30328

NCV - Braselton

1255 Friendship Rd.
Suite 240
Braselton, GA 30517

NCV - Canton

470 Northside Cherokee Blvd.
Suite 480
Canton, GA 30115

NCV - Gainesville

1276 Jesse Jewell Pkwy. SE
Gainesville, GA 30501

NCV - Midtown

1110 W Peachtree St NW
Suite 920
Atlanta, GA 30309

CARDIOVASULAR GROUP (CVG) - 770-962-0399

CVG - Snellville

1608 Tree Lane
Building C
Snellville, GA 30078

CVG - Duluth

3855 Pleasant Hill Rd.
Suite 250
Duluth, GA 30096
